

Try on Super-J

最新科技与半世纪经验的完美组合 Latest technologies harmonizing with experience over half-century

三工位沉降片装置令到SUPER-J能生产多种多样的花样，在此之外，分段独立调整的卷取装置可应付不同的编织需求。

With the incorporation of the 3-way sinker system device, our Super-J has the ability to perform a wide variety of pattern designs. In addition, our segment type take-down device is individually adjustable which results in the capability for the production to adapt to various needs.

本机配置的“起底板”装置和剪线刀/线夹装置可缩短生产周期，从而提高生产效率。

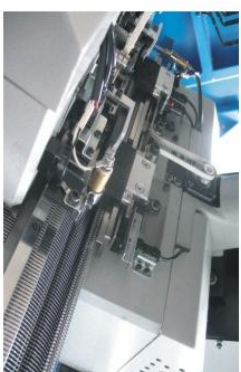

The machine is also equipped with the set-up comb as well as the yarn cutter & grippers which correspond to short cycle production and eventually yield contribution to the production efficiency.

SUPER-J 212

用精彩的点子来满足您的要求 Our variety of ideas to meet your various requirements

三工位沉降片 3-WAY SINKER SYSTEM

本机器配置的三工位沉降片，可在编织时决定是否作用，尤其在编织较复杂花样时，动作更顺畅，织物效果更理想。

The machine is equipped with the 3-way sinker system which can be programmed at will during production. This function is especially effective when knitting complicated fabrics; the machine can run more smoothly and the fabrics can obtain better effect.

动态密度 Dynamic stitch

精准的软件令到动态密度能够准确的执行，达到最佳效果。

Our precise software enables the dynamic stitch to execute in perfect effect.

起底板 SET-UP COMB

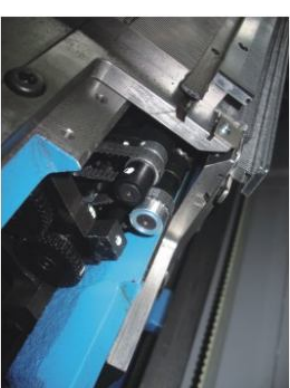

起底板的拉力与卷取张力一样分作31段调节以得到精细的编织效果。

Similar to our take-down roller device, the tension of our set-up comb device can also be adjusted in 31 steps to acquire smooth knitting.

无中生有样板 Empty needle knitting sample

主及副卷取罗拉 MAIN & SUB TAKE-DOWN ROLLER

分段式的主卷取罗拉可进行独立的压力调整以取得理想的卷取效果，副卷取罗拉安装在接近针床的位置，在编织“收针成形”时可充分的控制布片并赋予平均的拉力。Our segmented type take-down roller device has the advantage that each roller can be adjusted to regulate the surface pressure existed among rollers. The sub-roller is located near to the tip of the needle beds so that rational tension can be applied to the fabrics. This is an advantage to full-fashion knitting.

完美的三工位单面提花 Perfect knit-tuck-miss single jacquard
